INNOVATION

1st "one-piece" modular cover for spot welding gun

C.M.C. is an innovative solution providing optimum protection for your spot welding guns.

A unique assembly of special textile panels and various closing/attachment systems guaranteeing:

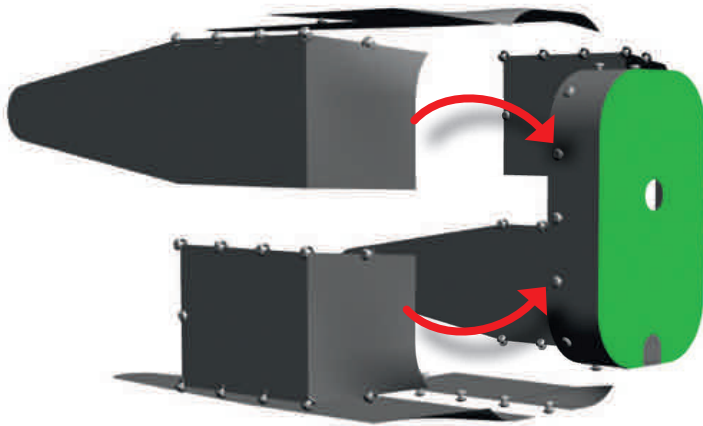

- . Efficient and long-life protection of your equipment
- . Time saving during maintenance operations
- . The preservation of your equipment in case of water leaks

C.M.C.

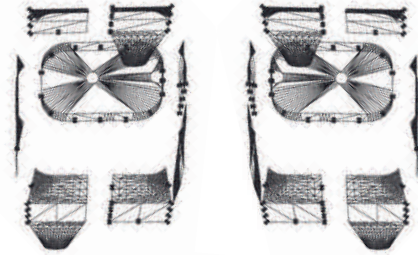

1st "one-piece" modular cover
for spot welding gun

Clever Modular Concept

patent application n° FR 16 55 101

- . One-piece cover consisting of several panels and adjustable to all types of welding guns
- . Intuitive installation and removal without tools in less than 10 seconds
- . Manufacture with a single seam for better overall resistance to weld splatter
- . Side panels connected to the front face to make removal of the cover easier.

New textiles:
TEXALIS® and CARDEL®

- . Halogen-free and Silicon-free
- . Tear-proof and electrical insulator
- . Limit adhesion of splatter
- . Fire-proof class M1
- . Resist water and oil leaks, etc.

To sum up, the benefits of C.M.C. are:

- . Improved MTBF¹ and MTTR² thanks to quick access to the welding gun and to the new CARDEL® and TEXALIS® fabrics
- . Optimised operating cost by easy replacement of worn parts only
- . Ultra-fast and simplified installation and removal without the need for tools

1. Mean Time Between Failures
2. Mean Time To Repair
